## FIRE

Igniting the inner fire with temerity and temptation, the element of fire takes a detour from the conventional. The contemporary take on cooking stations exemplifies an easy to install, convenient to maintain, and endearing to the eyes layout. Making the banquet and buffet experience more holistic and seamless the fire products are made from all things tough and durable.

## WATER

'Ingenious' as they say, it's the modish designs that make the glassware range so enticing yet exclusive. Idolizing the many parameters of the aqua-inspired theme, every piece resonates the meticulous skills and superior finish to fulfil the main purpose- every drink demands a perfect glass!

## SPACE

Innovations are stemmed out of infinite possibilities. A universe is driven by curiosity and zeal to discover the unusual and in turn be amazed by the wonders.. This concept is a revolution when it comes to modern-day novelties. An exploration of parameters which have an edge above the others. It's the idea of bridging the gaps between futuristic inventions and availability

## AIR

An essence of antiquity and charisma is reflected through the masterpieces that aren't time bound but are individually unique. The splendour of breezy and antique styles is echoed through the airy collection of cutleries; classic, vintage, copper, gold, and black. Every piece outlines the surreal bond between an inventive design and a premium quality.

## EARTH

Primitive and innate; the earthly inspired concepts strike the balance between the exquisiteness of nature's flair with the conviction of sustainability. The timeless elegance of the ashtray collection to the minimalistic placemats to the sleek salt and pepper mills to the edgy wooden boards; the accessories have an untameable rawness in appeal and sophistication in attitude.
